

Sec. 62-92. - Pipe at ditch lines for private driveways, etc.

- (a) Each owner of each lot abutting upon a dirt or paved street without curb or gutter shall provide pipes of adequate size and material, as approved by the director of transportation and utilities, for private driveways and walkways at the ditch line on city streets to carry the flow of surface water. Each driveway shall be constructed with a minimum of 20 feet of pipe.
- (b) The property owner or lessee may purchase pipe for driveways and walkways from the city and city forces shall install such pipe at a charge prescribed by the city council.
